UI/UX Design: Designing a Music Studio Responsive Web Application

Parvaneh Pouladzadeh

April 2021

Designed with Sketch, Miro

Including (Paper sketch, low-fi and Hi-fi Prototyping)

Design Process

This project is about designing Responsive web Application for a Piano Teacher.

My Hi-Fi prototype was created with Figma and consists of 3 web frames for Macbook pro.

The landing page is responsive and adjusted for macbook pro, Ipad Pro, and Iphone 11 pro max.

Here is the mock up [video](#)as well as the prototype [link](#)to observe better.
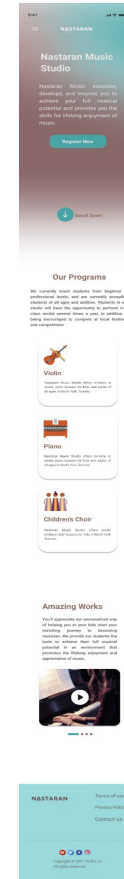

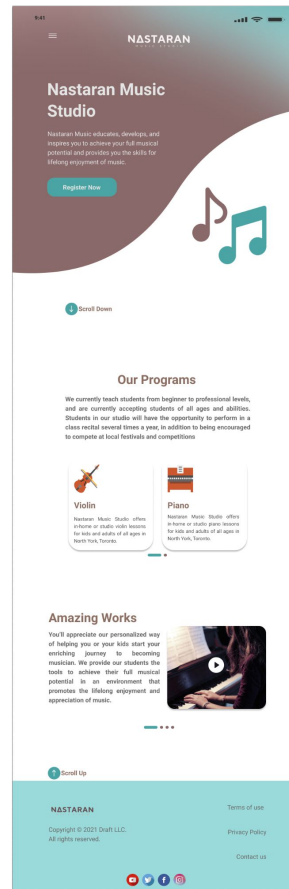

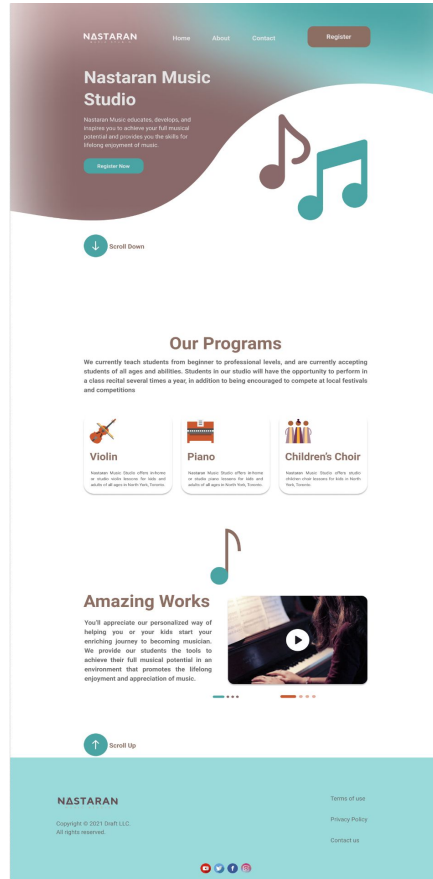

Color Pallet

Typography & Icons

As typography, I have used Roboto which is a free google font. It is part of the sans serif typeface superfamily.

Icons and illustrations always are an essential part of UI design. Icons should be meaningful, characteristic, and consistent; it should be compatible with the concept.
